Which css for each menu !?

Posted by jfbeaulieu - 2010/10/26 01:35

_____

Hi,

I installed your menu and everything work fine for the horizontal menu for the top of my website. I changed the safe_menu.css file to personalize it for me.

Now, I want to put an other menu at the vertical. Everything work fine but I don't know which file contain the right css to change the font, color, background, etc for the "vertical" menu. Is it inside the same .css file or it's an other one ?

Thank you very much !

Jeff

_____

Hello,

"Horizontal" and "Vertical" menus use the same CSS file.

Hi,

Thanks for your Quick answers ! But can you tell me which css tag i should modify to change the background, the width, the text color, etc ?

There is a lot of css tag inside this file and i dont want to pass an hour to find the one i should modify !!

Thanks a lot in advance !

_____

Information about menu styles can be found in this post. If you provide link to page where we can see menu which you want to modify, we can provide necessary CSS rules.
