## ARI YUI Menu - Dropdown goes behind module in IE7

Posted by svault - 2010/11/02 00:23

---

Hi there,

I'm using your menu function on a couple of websites. Please advice on how to fix the dropdown menu disappearing behind modules when viewing the website in IE7 or IE6. Thanks!

- 1) <http://www.languagecanada.com/>
- 2) <http://www.blueprintstrata.com/cms/>

Thank you for your assistance.

Cheers,  
Svault

Hello,

Use the following CSS rules:

```
body #rt-main-header
{
    position: relative;
    z-index: 10;
}
```

```
body #rt-main-surround
{
    position: relative;
    z-index: 9;
}
```

Regards,  
ARI Soft
