
Sub menu hiding underneath content

Posted by bigitybossman - 2011/01/03 23:55

Hi,

I'm having the problem of the sub menu sitting underneath the main menu of my site. unfortunately i'm working on this this offline so i'm unable to give you a link.

Are you able to point me in the right direction or is there something i should look for to fix this problem.

I have attached an image to help explain the problem.

Thanks heaps!!!

Hello,

Sorry, but screenshot can't help resolve this problem. We can try to help if you provide local copy of page with the menu. For this open the page in a browser, choose 'File -> Save Page As' menu item in browser's menu, choose 'Web page, complete' option, save all page files into your disk, archive them and send us by email.

Regards,
ARI Soft

Hi,

i changed the Z-index on my main header to 2000 and it fixed the problem. That might be a good place to start.

cheers

Re:Sub menu hiding underneath content

Posted by leykmekoo - 2011/01/18 07:06

Hello again....i have attached the file. There are also other problems when opened in IE. When i use 7 or 8 Menus of ARI YUI aligned vertically, the content loses its position (I used tables and they will not be aligned perfectly). (again only on IE.). So i guess i've added another problem. I hope you'll help and i'll be waiting for your response eagerly. Thanks.

Sorry about that...i'll attach the file now..... <http://www.ari-soft.com/images/fbfiles/files/Sample1.zip>

Hi

I have this problem too but only behind movies and both IE and FF.

link to the page with error :
http://www.samostour.com/newsite/index.php?option=com_content&view=article&id=39&Itemid=47&lang=en

menu item "Gallery & Video"

Please help

Hello,

Add the following CSS rules:

```
div#tabarea
{
  position: relative;
  z-index: 10;
}
```

```
div#whitebox
{
  position: relative;
  z-index: 1;
}
```

Regards,
ARI Soft

thanks for a quick and good solution.

just needed to add it under :

```
div#tabarea_l
```

```
div#tabarea_r
```

too
regards

Rune

:woohoo:

Hi again

Sorry but this only helped the Firefox problem. IE is still putting the menu behind videos.

Posted by admin - 2011/02/23 16:20

Hello,

Check that Flash video object contains wMode="transparent" parameter.
