
z-index?

Posted by mkariti - 2010/05/15 08:13

Hi there,
Many thanks for this great module!
I would like to reduce the z-index value as Im using a lightbox and the menu goes over the light box.
Can you please direct me to where about I can find it?
Many thanks

Hello,

You can open /modules/mod_ariextmenu/mod_ariextmenu/js/menu.min.js file, find the following code at the end of file:

```
Ext.ux.Menu.zSeed=10000;
```

and change '10000' to appropriate value for z-index.

Many thanks... solved it.
However, I do have another question as Ive just noticed that sometimes when I open the website and click on a menu button it will send me to a different menu item. but will always send me to the same menu item.Lets say I have the following menu nav bar:

Home | About | Product | Contact Us

No matter which one I will click it will direct me to the About button.
This happen sometimes when Im on the website (please bare in mine that my website is not live and I operate it on my computer).
Moreover, when Im using the sort items by option (got an e commerce website) I will stay on the same page but the button will show as if im in the About page!
Does this make any sense?
Many thanks

I am having the same issue (lightbox appears under menu)

I found the code you referred to in

```
/modules/mod_ariextmenu/mod_ariextmenu/js/menu.js  
(instead of menu.min.js)
```

I have changed the z-index as far as -10000, but the menu still shows on top of my lightbox

Add the next CSS rules:

```
.highslide-container  
{  
  z-index: 20001 !important;  
}
```

```
.highslide-container .outer-glow  
{  
  z-index: 20003 !important;  
}
```

You found the code "8.6.B.1g=10000;" in "/modules/mod_ariextmenu/mod_ariextmenu/js/menu.min.js" instead off "Ext.ux.Menu.zSeed=10000;" and change 10000 to 1

Hi!

I am having the same issue!
Where can I reduce the z-index?

I found this line in my website:

I tried reduce the code "8.6.B.1g=10000;" to "8.6.B.1g=1;", but not succesful.

Hello

I've similar problem with IE7 or IE8 with compatibility view enabled; please check out this page

Left menu is ARI Ext Menu

Top Menu is other menu

If you click in top menu on "Aktualnosci" then the other menu goes not over the ARI Ext menu

I've already changed Ext.ux.Menu.zSeed parameter to "1" and played with z-index attribute but it's still not working as expected.

Once again, this issue only appears in IE7

Hope you could help me...

Hi, same problem here. I'm not able to display a the bar for a youtube video. I included it vy using iframe, setting z-index parameter via Style attribute to 1. Then I went on the back-end and set the Ext Menu z-index to 100, but I still cannot see all the menu whem overing the links...

My website is: <http://www.hardwareforyou.it>

Thank you!

EDIT: working on Firefox, not working on IE8, not working on Chrome.

Hello I am having a similar issue with a site I am building

http://d2737005.u370.wcp hosting.com/beta/index.php?option=com_content&view=article&id=27&Itemid=15

using ari menu with slimbox plugin

When you select the image the lightbox is behind the menu bar. I have read earlier post and tried various solutions and am still not able to fix this for myself.

Hello from Latvia!

I have a site under development (<http://http://for-skola.optimal.lv/>) where I am using ARI Ext Menu. The problem is that the menu sub-categories don't show after i hover the button. It's absolute position is under the main component's module. I have tried all the suggestions here but nothing works. Can You help me, please?

Thank You in advance!
Joomla extensions directory will have +1 for Your ARI Menu module.

I just fix it, with this steps:

1. use firebug plugin in firefox for help me identify the ID of the slideshow
2. read some examples in w3schools.com/css
3. add the correct CSS rule

anyways, thanks admin for your time.
