
submenu width control

Posted by mkariti - 2010/05/15 17:30

Hi there,
How can I determine the width of the sub-menu?
I missing 5px to the left...!
cheers

Hello,

If you want to add 5px left padding to all sub-menus items, you can add the following CSS rule to your template CSS file:

```
.ux-menu .ux-menu-sub li a
{
    padding-left: 5px;
}
```

Hello,

Set 'Auto width' property to 'Yes' and add the following CSS rule to your template CSS file:

```
#pillmenu .ux-menu A
{
    float: none;
    text-align: left;
}
```

If you want that all sub-menus items have the same width, type the following code in 'CSS Styles' parameter in module settings:

```
#{ $id } .ux-menu-sub A
{
  width: 130px; /* Set appropriate width here */
}
```
