Modify Submenu

Posted by carscx - 2010/05/29 23:42

Hi!

I'm changing the CSS for items of main menu, but i can't modify the submenu items. I want to modify, background, font-size, font-color and more... but I can't find his class.

The image show the problem.

I tried with:
.ux-menu .ux-menu-sub li li a {font-size:12px !important;}

THANK'S

Hello,

You can use the following CSS rule for changing sub menu font color, background and others:

```
.ux-menu-container .ux-menu-sub LI A
{
  color: red;
  background: green none;
}
```

Font size and weight you can define in module settings for all items (main menu items and sub menus items).

Regards,
ARI Soft

Thank you very much, I've solved differently.

I changed the file /modules/mod_ariextmenu/mod_ariextmenu/templates/main.html.php about line #53

printf('#%1$s A{ /*font-size: %2$s !important; font-weight: %3$s !important; text-transform: %4$s !important; */}',

by this
printf('',

And the line about #64

sprintf('#%1$s A{ /*font-size: %2$s !important; font-weight: %3$s !important; text-transform: %4$s !important; */}',

by this
printf('',

I canceled the options of backend, to manage it with only CSS. And I have succeeded, thanks to this code:

.ux-menu-sub li a {background:#eee;color:#505050;font-size:14px !important;font-weight:bold !important;text-align:left !important;border-top:0 !important;border-bottom:0 !important;border-right:1px solid #C5C5C5 !important;border-left:1px solid #C5C5C5 !important;padding:7px !important;}

.ux-menu-sub li a:hover {background:#fff;color:#505050;font-size:14px !important;font-weight:bold !important;}
.ux-menu-sub .ux-menu-link-last a {border-bottom:1px solid #C5C5C5 !important;}
.ux-menu li li{width:200px;height:auto;margin:0px;padding:0px;}

You can see the final result on the image below:
http://www.ari-soft.com/images/fbfiles/images/menu2.jpg

Thank you very much.

Regards,
