Menu not visible in beez3 top position 1

Posted by Slinger - 2013/11/08 13:57

_____

The menu does not display at all. I am using Joomla 3.1, beez3 template, top position 1. I have set it to the main menu and on all pages, horizontal. I changed to position 7 and it appears. but will not in position 1. I noticed that I select Top and after saving just says position 1 (so, don't see "Top" in the position anymore after saving).

_____

Hello,

Where we can see the problem?

Regards,
ARI Soft

_____

This problem with site template styles. Add the following CSS rules to fix the problem:

```
#header
{
 overflow: visible !important;
}
#header ul.ux-menu li a:link,
#header ul.ux-menu li a:visited
{
 display: block;
 padding: 10px 14px;
}

#header ul.ux-menu li a.ux-menu-link-parent:link,
#header ul.ux-menu li a.ux-menu-link-parent:visited
{
 display: block;
 padding: 10px 24px 10px 14px;
}

#header .ux-menu ul.ux-menu-hidden
{
 display: none;
}

#header ul.ux-menu
{
  right: 0;
  margin: 0;
  padding: 0;
```

```
 position: relative;
}

#header ul.ux-menu-sub li
{
  text-align: left;
}

#header .ux-menu-container ul
{
 max-width: none;
 padding: 0;
 margin: 0;
}

#header ul.ux-menu
{
 top: 0;
}
```

_____

This fix does make the menu visible, so thanks for that work.

However the menu is visible under the banner section and not above as the Main Menu Joomla components shows.

_____

Use the following CSS rule:

```
#header ul.ux-menu
{
  top: -285px;
}
```

instead of:

```
#header ul.ux-menu
{
  top: 0;
}
```

Regards,
ARI Soft

_____

That does not appear to be a good approach. why is the top not the same for both?

I made this change and it did not go all the way to the top. But, I'm concerned about this approach which seems like a band-aid approach.

_____

These custom CSS rules are requires due to styles of site template for default menu in selected module position. It is used absolute position for this menu and it is a really bad approach if necessary to use 3rd party menu extensions.

_____

Hi,
I tried all this, just does not work. I copied the code above to position ccs, is that correct?
I would even be happy to have it in position 2, if it would be right under the header image, but there is a space between the image and the menu, looks ugly.
My site is: www.sur-walks.com
Can you help, please
Regards
Johanna

_____

The posts contains custom CSS rules which can be added to "CSS Styles" parameter in module settings.

_____

Check your mail. We sent the screenshot where menu and site template positions are shown. The menu is shown in position-1.

Send an image and mark where you want to show the menu.

_____

Thank you so much! looking so much better now!
Just one more: I have been trying to make the width of the menu the same as the header, but could not find how to, can
you help?
Thank you again.

_____

following instructions on this site, I have managed to strech the manu to full size introducing the code below and adapting
it to my site, but it does not alow me to have a automatic size for each menu item, they are all the same, no matter how
long the text is.

#header .ux-menu LI A
{
 display: block !important;
}

#header .ux-menu LI.ux-menu-item-level-0
{
 width: 150px;
}
