I don\'t want it transparent

Posted by MarfilFlacky - 2010/06/04 22:07

_____

I have 2 problems:
1. The menu looks transparent, and it is confuse in my site. I have looked without succes for a parameter to change this. How can I fix this ?
2. The menu is showed back the other modules and back the articulos. How can I bring it to front ?

The menu works horizontally into a module (top1 position).

Many thanks

_____

Hello,

It seems your template CSS styles override styles of menu. Provide link to page, please, where we can see this issue that we can help you.

Regards,
ARI Soft

Hello, thanks for the answer.

I finally fixed the problem. It was related with the template I think.
I changed from a left module to a banner module, and the problem goes away.

The link to my site is www.masterisi.com.ar. There you can check it.
Congratulations for the work. The module is fantastic and, again, thanks for the answer.
