
Line-height of submenu items

Posted by parnesjo - 2014/02/16 16:43

Hi,

I can't find the css to increase the line-heights of the vertical sub menus (under the horizontal main menu) at <http://dev.tavlogram.se>.

Please help.

Hello,

Use the following CSS rule:

```
UL.ux-menu-sub LI A
{
  line-height: 30px !important;
}
```

Thank's for the super fast reply, excellent! :)

As before, the menu "Skicka fototavla" does not show up as active. It's an url-link. Is this something that ca be fixed with css in ART Ext Menu?

I'm almost ready now. I have finally found my menu module that works both on desktop and mobile devices :)

One more css-question. How to change the padding or margin for the sub menu items on <http://dev.tavlogram.se>?

Add the following CSS rule:

```
UL.ux-menu-sub LI A
{
padding-left: 10px !important;
}
```

Regards,
ARI Soft
