
Ext menu, search and language filter modules

Posted by Foodstyling - 2014/03/02 16:28

Hello,

I am currently make my site with Joomla 3.22 and protostar.

The menu module works fine, but when putting the search and language filter module on the same line then the menu, the search and language filters stopped working. I tried the code you suggest in another thread, but it doesn't work for me.

Thanks for help,

Foodstyling.

Hello,

Where we can see the problem?

Regards,
ARI Soft

What a quick answer!

The site is local for the moment, because it is not ready yet. if needed, I can put it on a test server in the morning.

Add the following CSS rule:

```
.navigation .search,  
.navigation .mod-languages  
{  
  position: relative;  
  z-index: 10000;  
}
```
