Wrong menu size

Posted by xiaohong88 - 2014/03/18 08:27

_____

I have a old Joomla website with version 1.6.5 and ari ext menu version 1.2.6.
The second menu (attached image) shows the menu size exactly same with the parent. I have double check on the ordering is correct.

I not sure where should I check the error and I don't wish to upgrade the joomla or ari ext menu.

Hope someone can help :(http://www.ari-soft.com/images/fbfiles/images/wrong_menu_size.PNG

Hello,

Where we can see the problem?
