
ARI Ext menu - Curved boxes ?

Posted by C3002 - 2014/03/18 09:53

Hi everybody,

I just installed ARI Ext Menu in Joomla 3.2; works perfect, but I should like to customize one thing: in the horizontal menu the text appears in a square box; I should like to display the menu-items in a so-called curved box.

Where can I find the CSS to change this ?

Thanks in advance !

I'm a bit confused: "This" appears to be a <mailto:info@arisoft.com>; it is not a post ???
I actually expected referral to some post in this forum

Regards

Very useful CSS-coding. One extra question:in which CSS-file or parameter should I copy this code ?

Thanks in advance ..

Custom CSS rules can be added to "CSS Styles" parameter in module settings.

It may look very stupid, but I fail to see any CSS-style parameter in the module settings; no can I find any CSS-files specific for ARI Ext menu.
Where can I find the documentation with respect to this module ?
