
Okay, I installed it, now what?

Posted by eventide - 2014/04/07 20:40

This is just the second extension I've installed, so go easy on me!

Anyway, I installed the ARI Ext Menu via the Extension Installer (I'm using Joomla 3.x).

I'm not sure what to do from there. I just see the default Joomla menu manager - where do I access the AR Ext Menu editor?

Oh, and yes, its status is "Enabled" in the Extension Manager

Thanks for your help.

Hello,

Read this post please.

The video tutorial refers to Joomla 1.x, and as I mentioned I'm using 3.x but I figured it out on my own. Thanks anyway.

Main principles to create menu items and using the module are similar for J! 1.5 and 3.x.
