Changing Text color in .ux-menu

Posted by tom28051976 - 2014/04/13 12:06

Hello,

I want to change the text color of the menu (shown in screenshot) from orange to grey.

I guess it can be done by changing the properties of .ux-menu.

Can you tell me how to do this?

Hello,

Send the screenshot by email.

Regards,
ARI Soft
