I'm having the same problem, and have also used this module before and was able to edit colors (not anymore), I attach the screenshot [http://www.ari-soft.com/images/fbfiles/images/Screen\\_Shot\\_2014\\_05\\_05\\_at\\_1.png](http://www.ari-soft.com/images/fbfiles/images/Screen_Shot_2014_05_05_at_1.png)

Hi,

I've exactly the same problem: the menu item styles are greyed out and cannot be edited.  
Looks like snapshot by beromoon before.  
Using Joomla 3.3.0. In earlier versions (last 2.5.19) everything worked fine.  
Any solution?

Thanks  
Koepi

Hello,

Download and upgrade the module. v. 2.2.11 is compatible with Joomla! 3.3.0

I am using the latest version, I downloaded it from this URL

How can I find the version you mention?
