Overflow Problem

Posted by timi11 - 2014/05/05 16:11

_____

Hello, i have a overflow Problem in Gavick.com Templates.

The old Code will not work for the new Versions.

Old Code:
#gkPage #gkLeftTop .box
{
 overflow: visible;
}

#gkPage #gkLeftTop .ux-menu LI
{
 padding: 0;
}
#li.ux-menu-item-main
{
 width: 185px !important;

}

Here is a little Box Header crashed.

See here: Site with the crashed Box Headers

Thanks for your Help... timi11

_____

Hello,

Send an image where we can see the problem and specify what browser you use.

Regards,
ARI Soft

Thanks for your Reply...

Pic 1. ist with the old Code:

http://dc-helden.de/images/withCode.png

Pic 2. is without Code the submenu is under the Contend

http://dc-helden.de/images/withoutCode.png

Thanks, timi11
