## menu not centered

Posted by firstinthewind - 2014/06/01 19:11

---

Hello,

its a great menu, but i have a problem:

i try to get the menu and submenu centered in horizontal mode, but it allways floats left.

The point text-align center in the menu did not change anything.

I already tried to disable whole css for template, but that changed nothing.

login guest

pass guestx

Anyone an idea what the problem could be?

thanks

Hello,

Add the following CSS rules:

```
DIV.ux-menu-container
```

```
{  
  text-align: center;  
}
```

```
DIV.ux-menu-container UL.ux-menu-horizontal
```

```
{  
  display: inline-block;  
}
```

and remove your custom CSS rule which adds "position: fixed" CSS property to menu container.

found now a solution, the sub-ul was too small - as big as the text, so it was left, givin it a width fixed the problem:

```
ul.ux-menu-sub{  
width:90%!important;
```

```
}  
ul.ux-menu-sub li{  
width:100%;  
text-align: center;  
display: inline-block;  
}
```

thx for code-investigation :)
