Hello,

thanks for this nice menu.

When i place this one in position 7 on the left site it works fine,

when i place it on position 1 top menu it does not work or i do not see it.

I gave it also the number 1 in the ranking in the module positions.

It must be something simple but i do not see it.

the site url is: <http://www.http://www.unfm-nl.nl/homepage>

thanks
