Top menu goes behind slideshow in Firefox
Posted by morten44 - 2014/07/01 09:20
_____

Hi
Sorry to ask a question that has been made so many times.
I have studied the other answers to see if i could find the correct css statememnt to add the z-index value
This is the page http://new.humana-ecuador.org
There is only a submenu on "Proyectos"

I tried to add z-index to #s5_menu_wrap but that did not help
Can you give me a hint where to add the code?

Thanks

Hello,

The page doesn't contain "ARI Ext Menu" module.

Regards,
ARI Soft

Hi
Thanks for your reply

We are using ARI Image Slider as a slideshow module on the site
Is this not the correct forum for this?
please se web url above. it has new. subdomain infront of website instead of www.

Hi
Ah sorry
I put z-index in several places in a desperate attemt and as i sit on a school with a proxy server it takes longer time
before the settings are updated.
Sorry for your trouble and thanks for comming back to me
