My site is locally installed so I am sending you pictures of the problem

Here is my submenu

Hello,

Set "Show only active sub-menus" parameter in module settings to "No".

Thank you for quick reply.

It is set to "No" and problem still remains

We can investigate the problem in more details if you provide a link to a page where we can see it. Unfortunately we can't investigate this problem by screenshots.

Check "Menu assignment" parameters section on module settings page. It seems the module is configured to shown only on specific pages.
