
menus suddenly corrupt the site

Posted by davef - 2014/07/24 07:55

Hi I have about 10 ari ext menus that were working fine until i added the last one; suddenly any one published corrupts the site.

<http://prfhs.org> with one of the ten ari ext published does this:

"
"

When i unpublish the 10 menus, all is well (i put back in the basic mainmenu to navigate)

I have no php or js knowledge

Is there any easy fix?

thanks, Dave Florence

Hello,

We don't see a problem on the page.

Regards,
ARI Soft

Problem solved!!

I'm a newbie, and created a stack overflow by using "menu alias" for the first time and pointing two menu items at each other.

duuhhhhhh. Working too late in the evening....

Slept a few hours, woke up and thought about what i was doing when i caused the problem, and realized my error.

Thanks for checking it out; as you said its ok now

by the way, Ari Soft, i really like the ari ext menu.

Thank you for making it available for free.

Dave Florence
