
Space between menu items in vertical menu

Posted by joh123 - 2014/08/01 12:34

Hi,
I have this page here <http://www.nspc2015.com>

and I'm trying to get the menu items closer together, but can't find a way to do it. In the demo page of this module, all the menu items touch each other. I would like them to have a small spacing in between, but even touching would be better than these large spaces. Could anyone help?

Thanks in advance!

Hello,

This problem with site template styles. Add the following CSS rules to "CSS Styles" parameter in module settings to fix it:

```
UL.ux-menu LI {padding: 0 !important;margin: 0 !important;}
UL.ux-menu LI:before {display: none !important;}
```

Regards,
ARI Soft

I would like to add spaces in a horizontal menu. Would I use the same line of code, but just add some numbers in for the padding? <http://www.eriecbbd.org/provider-search>. Thank you.

Hello,

Send an image where we can see what do you want to achieve.

Regards,
ARI Soft

Add the following CSS rule:

```
UL.ux-menu LI.ux-menu-item-main {margin: 0 5px !important;}
```
