Submenus suddenly disappeared

Posted by nioliv - 2014/09/28 15:01

_____

Hi

Everything worked just fine with the menus but suddenly the submenus don't fly out any more
http://j333.getmjÃ¶lkstvÃ¥l.se/

I have a clone of that site where I play arround and testing different extensions and there is everything working perfect
http://j3.getmjÃ¶lkstvÃ¥l.se/

What can have happened?

_____

Hello,

Set "Load ExtJS library" parameter to "Yes" in module settings.

Regards,
ARI Soft

_____

There was only one who was "No" and that effected all of them. Now everything is working.
Thanks
