Horizontal Menu - Each box same size and set width

Posted by Dizmatic - 2010/06/29 15:49

I have this menu at the top of my page but I need each link box to be the same size and I need to set the menu to a specific width so it can line up with the header image below which is 936px. Thanks

Hello,

Provide link to page where we can see the menu on your site, please, that we can help you.

Hello!

Can you tell me how to set the submenus width? It's perfect in Safari, but in Firefox it is break to two line the link.

Here is the capture:
http://www.taxi4rallyeteam.hu/capture.png

And the working site:
www.taxi4rallyeteam.hu

Thank you very much!

Hello,

Could you specify what version of FireFox you use? When we open your site in FireFox 3.6.6, everything looks good.

Hello,

I updated my browser to Firefox 3.6.7. and the result is same.

Is there any way to set a fix width to cells?

Thank you very much!

It's strange, we have checked it again in FireFox, Google Chrome, IE 7 and 8 browsers and it works. If you want to specify width only for sub-sub menu items of 'Videok' menu item, use the following CSS rule:

```
.ux-menu-container .ux-menu .ux-menu-item14 UL UL LI
{
  width: 160px !important;
}
```

Thank you very much!

It works fine!
