seperator between links, need help
Posted by dothanby - 2014/10/21 20:29

_____

joomla 3.3.6
See site

I removed the borders from the menu by making all the same color as the background color, now I need a separator 2px wide color is #ffffff

I tried making the right border only white but and it works but also places a border in front of the Home menu item too and don't want that.

_____

Hello,

Use the following CSS rules:

.ux-menu-horizontal LI.ux-menu-item-main {border-right: 2px solid #FFF;}
.ux-menu-horizontal LI.ux-menu-item-main:last-child {border-right-style: none;}

Regards,
ARI Soft
