
How can i block the first field, vertical menu

Posted by fiaba - 2015/01/12 15:14

Hi.

I need to block the first field also in my submenues due to that i need to create a tree with a lot of voices. I want to separete them into submenus ordered in years.

for example:

Event 1
----- 2010
----- 2011
----- 2012
Event 2
-----2014
-----2013
-----Sub-event
-----Italy 2013
-----Germany 2013
etc....

The first field have to not work.

In my case I need that the fields Event 1, Event 2 and Sub-event are not cliccable. I don't find anything with the search button. Normaly means, that its so easy that i'm too stupid to do that :laugh:

Thank for any Help.

I'm using an old version of ARI Ext Menu.

2.2.1 October 2012 ARI Soft for joomla 1.5.26

Hello,

Set menu item type to "Text separator".

Regards,
ARI Soft

:woohoo:

What??? It was a simply newbie f... problem? I did find a lot of solutions in the past to solve also big problems and now i was blocked by this.....

Thank you..... :blink:

Now i'm going to my house angle to shame of myself.....
