Drop down Submenu Items Hidden

Posted by Doc Martin - 2015/01/15 04:14

_____

On a tablet, when the menu is behaving responsively, cannot see some drop down submenu items because they are covered over by second row of top level items. See here www.exmouthcoastwatch.co.uk .
What solution would look best please ?

Thank you for your time and effort.

_____

Hello,

Add the following CSS rule to "CSS Styles" parameter in module settings:

.ux-menu-sub {z-index: 20001;}

Regards,
ARI Soft
