
Hidden submenus - cut off problem

Posted by markec - 2010/07/06 09:18

Hi, I have a problem with menu system.

Submenus are not shown correctly on many templates. The main menu is OK, but submenus are cut off. This happens only when I enable right module position. Otherwise everything is ok.

This is my chess site, that I am working on - <http://www.sah-kocevje.si/portal/>

Is there any problem with z-index?

Can you please help me with solution? Thanks

Hello,

Add the following CSS rule to site template CSS file or to 'CSS Styles' parameter in module settings:

```
#main-body .s-c-s .col2
{
  overflow: visible;
}
```

Regards,
ARI Soft

It works!

Thank you soo much. I have never seen such a quick response.
