## Hover colour on \'current\' item

Posted by Neil at LUEC - 2015/02/16 18:26

---

How do I change the background colour of the \*current\* menu item during hover?

=====

Hello,

Information about menu HTML layout and CSS classes is available here. It can be used to customise the menu.

Thanks admin, but I've not been successful (I can't see where it's getting the other colours from either, they're not in menu.min.css) - I've guessed variations on "ux-menu-link-hover.current {background...}" but that didn't work. .

Could you send a link to a page with the menu?

Add the following CSS rule to "CSS Styles" parameter in module settings:

```
.ux-menu .current>A:hover {background-color:red !important;}
```
