## Change style of only one item

Posted by Aleister - 2010/07/08 13:02

---

Hello,

is it possible to change css style of only one item in the main menu? Fe. at this website: <http://complyfl.cz/> I'd like the menu item Test IZ to have different background image. Is there any way to achieve it?

I wouldn't even mind move this item to the right end of the menu and use CSS described here: <http://www.ari-soft.com/ARI-Ext-Menu/5342-CSS-for-1st-last-main-menu-items.html>, but it also changes the looks of last items of vertical sub-menus, thus unusable.

Thank you very much for any help ;)

Ales

Hello,

We have updated the module, download and upgrade it, please. After this you can type in 'CSS Styles' parameter the following CSS rule that define background of necessary menu item:

```
.ux-menu-container #{$id} li.ux-menu-item a
{
  background: red;
}
```

Only replace `with 'Test IZ' menu item ID.`
