Different Colours for Specific Menu Items ?

Posted by Doc Martin - 2015/03/10 09:07

Is there any way I can allocate a different colour to just some Menu Items ? I would like my 'Members Area' menu items to stand out from the regular public menu items.
Thank you. ARI Ext Menu in Joomla 3.4

Hello,

This post contains information how to change width of specific menu item(s). Similar approach can be used to change color of specific item(s).

Regards,
ARI Soft

Thank you - I tried it as follows :

```
LI.ux-menu-item101
{
 width: 122px !important;
}
.ux-menu-sub {z-index: 20001;}

LI.ux-menu-item119
{
color:#333300;
}
```

The first bit was following your advice some time back on sub-menu transparency; the last bit is my attempt to make menu item 119 a different color but it didn't work. Is my syntax correct ?

Could you send a link to a page with the menu?

Regards,
ARI Soft

It is not possible to open your site with the provided credentials. "You can't access the private section of this site." warning appears.

Sorry about that, I have set up

user : ARIEXTMENU
password : ARIEXTMENU

Thank you

Add the following CSS rule:

```
UL#ariext109 LI UL.ux-menu-sub LI.ux-menu-item119>A {color: red;}
```

Thank you for your PM response. I inserted the CSS code as suggested but I see no change. Have cleared cache. The CSS code now looks like this :

```
LI.ux-menu-item101
{
 width: 122px !important;
}
.ux-menu-sub {z-index: 20001;}

UL#ariext109 LI UL.ux-menu-sub LI.ux-menu-item119>A

LI.ux-menu-item119
{
color:#333300;
}
```

Your further advice appreciated,

Doc Martin

You use an incorrect CSS rule. Copy the correct rule from our previous post.

Finger trouble on my part. Apologies. Your CSS rule works fine. Thank you very much.
