
Font Colour

Firstly, thanks very much for the product, I've been madly downloading modules and this is the only one that looked like it would come close to working properly.

I have been struggling with this for a while and am not really sure if the template CSS is over riding the changes I am trying to make.

Please understand I am a very inexperienced beginner.

I am simply trying to change the basic font color to white and the hover colour to, lets say, black.

This is the code I have currently. You will see I also applied a change to the borders that you had posted here previously.

I hope you can help me.

Cheers.

```
}
```

```
.ux-menu-container .ux-menu a

```

```

```

```

```

```
}
```

```
#pillmenu .ux-menu .ux-menu-sub li

Add the following CSS rules:

```
#pillmenu .ux-menu a
{
  color: #FFF;
}
```

```
#pillmenu .ux-menu a:hover
{
  color: #000;
}
```
