Edit Border Colour

Posted by blackdog - 2010/07/09 18:13

Amazing what a good nights sleep and some proper professional help from you guys can accomplish.
I am beginning to get things looking how I want them.
I would like to make the top bottom and side borders a darker colour. Any suggestions?
Website http://comparticle.com/
I also have a problem with the Cooking tab sliding off the page. When you hover down to Recipes which opens into a new set of sub-menus it opens to the right and is partly obscured. Can it open to the left?

---

1. You can add the following CSS rules:

```
#pillmenu .ux-menu a
{
  border-top-color: black;
  border-bottom-color: black;
}

#pillmenu .ux-menu a.ux-menu-link-first
{
  border-left-color: black;
}

#pillmenu .ux-menu a.ux-menu-link-last
{
  border-right-color: black;
}

#pillmenu .ux-menu li li a
{
  border-top-color: #CBC0B7;
  border-bottom-color: #CBC0B7;
}

#pillmenu .ux-menu li li a.ux-menu-link-first
{
  border-left-color: #CBC0B7;
}

#pillmenu .ux-menu li li a.ux-menu-link-last
{
  border-right-color: #CBC0B7;
}
```

2. The module doesn't provide this ability, but you can use the same width for sub-menu items that it looks normal.

Thanks for that, not entirely happy with the result that adding the extra code gives so I will leave it as is.
I am interested in making the sub-menus the same width though. Can you explain how to do it?

Thanks.

Add the following CSS rules:

```
#pillmenu .ux-menu LI LI,
#pillmenu .ux-menu LI LI A
{
  float: none;
}

#pillmenu .ux-menu LI LI A
{
  text-align: left
}
```

Thanks once again. Thats has made all the sub-menus the same width. However, I think that width is infinity. The sub-menus slide off the page into the great unknown. LOL. Any ideas on how to restrict this effect to the page width or a set dimension?

Hello,

Sorry, use the following CSS rule:

```
#pillmenu .ux-menu LI LI A
{
  float: none;
}
```

instead of the previous CSS rule:

```
#pillmenu .ux-menu LI LI,
#pillmenu .ux-menu LI LI A
{
  float: none;
}
```

That change made the drop downs perfect, however, it also created havoc with the rest of the page elements and completely screwed the layout.
Cheers

Don't know where that last post went.
These rules made the sub-menus appear perfectly but created havoc with the page layout and order.
Cheers.

It's been a week with no reply. Have you guys got a solution for fixing the width issue of the menu on my site?

Hello,

We can't reproduce this issue with our latest solution. If you provide temporary access to your Joomla! backend by email, we can investigate this issue more deeply and try to provide solution.

Regards,
ARI Soft
