## Show Title

Posted by Donna - 2010/07/10 06:13

---

Hi There

I have 'Show title' set to yes in the mod however it doesn't actually show anywhere

I am using it as a horizontal menu, however I need 2 menus, and would like to have the title to the left.

Just wondering if there is an easy way of doing this?

Cheers.

Hello,

Title showing behaviour can depend on site template. Try to use 'Custom HTML' module in position where you try to use 'ARI Ext Menu' and check display it title or not.

Thank you for getting back to me so quickly - The titles are now showing.

One more question though if you dont mind - is there an easy way to get the title to show to the left instead of above the menu?

Cheers.

Could you provide link to page with the menu and create screenshot where we can see where you want to place module title? If it's private, you can provide it by email.
