Problems showing the submenu

Posted by karbal - 2015/05/06 13:16

Hi,

I've installed ari ext menu on our site and it looks great !
But it doesn't show all the submenupages...
http://bit.ly/1EXeru1
the positions are the only possible to put the menu, otherwise it is shown like it's cut off

Is there a way to solve this ?

Thanks and kind regards

Hello,

Add the following CSS rule to "CSS Styles" parameter in module settings:

#fav-intro .moduletable {overflow:visible;}

Regards,
ARI Soft

Thanks for the quick response !
But it doesn't seem to help... when I try to use the horizontal menu it doesn't show the submenu at all...
