problem with submenu level 1 and 2
Posted by ajdv - 2015/07/03 20:47

I am very pleased with the Ari Ext Menu.
But have a problem.

After putting :
#{$id} LI.ux-menu-item MENU_ITEM_ID6
{
width: 1200px;
}
in de CCS Style
The problem with the basis (leve 1) menu was solved, but when i click on a submenu level 2 te menu doesn't apear on that page.

Only the menuitem level 1 (the root) is shown, not the other first level categories.

Please help.

Hello,

Could you send a link to a page where problem occurs?

Regards,
ARI Soft

---

http://www.ari-soft.com/images/fbfiles/files/vb.doc The site is not yet online
but here some examples.

I use the Bogus template

Try to set "Show only active sub-menus" parameter to "No". If it doesn't help then we can investigate the problem if you provide a link to a page where the problem occurs and a temporary access to J! backend by email.

Regards,
ARI Soft
