
Chrome and Firefox

Posted by Hughcam - 2015/07/24 04:52

Hi,

The Ari menu is great, but I have a problem which i do not know how to fix.

In Firefox my webpage shows up great but in Chrome the menu bar is not full.

Hello,

The menu is shown fine in FireFox and Google Chrome browsers on our side. Could you send a screenshot where we can see the problem?

Regards,
ARI Soft

We can't reproduce this problem, the menu looks the same in FireFox and Google Chrome, but you can read how to change menu item width here.

Regards,
ARI Soft

The site looks the same at this end as well.. but if you really want to make it look the same in both browsers here's what you can do.

- remove the background color from the link item in the navigation pane (the background-color when hovering the link items stays)
- put the same background color on the navigation ul item. This forces the background color to the width of the ul item.
