
Current Page Link color stays the hover over color

Posted by Shoot - 2010/07/18 22:50

Is there a way to keep the parent menu item the hover color when on that page?
say when you hover over the link in the menu then you click it and go to the article. That link stays the hover over color to indicate the page you currently on.

Site link for reference.

Hello,

You can use the following CSS rule that define background of selected menu item:

```
.ux-menu-container .ux-menu a.current
{
    background: red none;
}
```

Thank you so much, it works for all the buttons but doesnt work when clicking the marketing tools, blog,newsroom,and videos links. Why would it work for all the other links and not those? This is the last thing i need to do with your menu and your have been awesome in helping me customize it. I really appreciate it.

Hello,

Could you provide temporary access to your Joomla! backend by email that we can investigate this issue?

Regards,
ARI Soft
