
Customized button color

Posted by improphesize - 2010/07/20 01:49

Hi - first off, I love your module! It's great. Is there anyway you could post a general tutorial (or just code) on how to change the colors of the buttons and the hover?

thanks so much!

Hello,

You can use the following CSS rules that define background colors of menu items:

```
/* menu items */
.ux-menu-container .ux-menu .ux-menu-item-main a
{
    background: red none;
}

/* hover menu items */
.ux-menu-container .ux-menu .ux-menu-item-main a.ux-menu-link-hover,
.ux-menu-container .ux-menu .ux-menu-item-main a:hover
{
    background: green none;
}
```

Regards,
ARI Soft
