Submenu not full width

Posted by reivax08 - 2015/08/19 16:32

I installed the ARI Ext Menu and love the features, but I'm having a slight issue with a submenu I added. The last menu item in the submenu in not the same width as the previous ones. See attached image. How can I correct this. Here is a link to my site which I'm putting together: http://www.clevelandencounter.com/joomla/ http://www.ari-soft.com/images/fbfiles/images/Menu_highlight.jpg

Hello,

This problem with the following custom CSS rule:

```
.ux-menu-container .ux-menu a.ux-menu-link-last
{
  width: 70px;
}
```

Regards,
ARI Soft
