Sub Menu/Children Items are cut-off
Posted by rober9 - 2010/07/20 18:54
_____

Hello!

I'm having the same problems as some of you guys, my dropdown submenus are being cutoff by the object immediatly below it.

I see some of you solved it by setting overflow: visible to the menu on the css, but I can't figure out what object to set it to.

My site: www.avanttravel.com.ar

Thanks in advance!
Roberto

_____

Hello,

Add the following CSS rule to site template:

.bg-3 #header
{
  overflow: visible;
}

Regards,
ARI Soft

Wow, that was fast!
It's much better now!
Thank you!
