jpg-buttons, borders, menuhight
Posted by oli - 2010/07/22 10:27
_____

Hi there,

I have some questions, but first like everyone here i have to say, thank you a lot for this nice module.

My questions are:

1. Is it possible, to put a jpg or png as buttons into the menu? Perhaps 3 different buttons with mouseover and klick too?

2. How can I delete the borders of the menu?

3. If it is not possible to put jpg/png in as buttons, how can i get the hight of the menu smaller?

I have read some of the articles here and tried some tipps, but I m not sure where I have to put in the sourcecode given. Is it in template.css or somewhere in the mod_ariextmenu folder?

Link to the page is:
http://www.kÑŒnstlerkeller-zwingenberg.de/

thank you a lot
oli

Hello,

The module doesn't provide possibility to use .jpg image as menu items. Regarding other questions, add the following CSS rules, please:

.ux-menu .ux-menu-arrow
{
  top: 10px;
}

.ux-menu-container .ux-menu a
{
  border-top-style: none;
  border-bottom-style: none;
  padding: 6px 16px;
}

.ux-menu-container .ux-menu .ux-menu-sub a
{
  border-top-style: solid;
  border-bottom-style: solid;
}

.ux-menu-container .ux-menu a.ux-menu-link-first
{
  border-left-style: none;
}

.ux-menu-container .ux-menu a.ux-menu-link-last
{
  border-right-style: none;
}

.ux-menu-container .ux-menu .ux-menu-sub a.ux-menu-link-first

```
{
  border-left-style: solid;
}
```

`.ux-menu-container .ux-menu .ux-menu-sub a.ux-menu-link-last`

```
{
  border-right-style: solid;
}
```

Regards,
ARI Soft

Thanks you,

I added the code, but it left over borders, especially in the submenus, there are still borders.

And the blue arrow is on the font, is it possible to delete this arrow too?

and a last question, is it possible to make the buttonbackround of the first row (the topentrys) invisible?

Thank you again

_____

Use the following CSS rules:

```
/* Remove sub-menus borders */
#art-main .ux-menu-container .ux-menu .ux-menu-sub a
{
  border-left-style: none;
  border-right-style: none;
  border-bottom-style: none;
  border-top-style: none;
}

/* Remove arrows */
.ux-menu .ux-menu-arrow
{
 background-image: none;
}
```

About the last question what do you under the first row? Could you provide screenshot that we can see what you mean?

Regards,
ARI Soft

Hey there,

I m testing a lot at the moment, and by now, i saw, that there there is a possibility to get images in the boxes. That looks very amazing for me, and would be very nice, if i could handle the width of the whole boxes.

Is it possible, to set all boxes (menuitems) to a fixed width.

Thanks

_____

Try the next CSS rule:

```
#art-main .ux-menu-container .ux-menu a
{
 width: 60px !important;
}
```

Woohoo ;)

still not exactly what it should be, but getting close to it ;)

Problems:

- the submenus have not the same width as the topmenu, the submenuboxes are smaller

- the words in the boxes are alined left, how can I aline them center (and perhaps at the top of the box)

http://www.kÑŒnstlerkeller-zwingenberg.de/

Thanks very much for your patience, and of course for your help ;)

_____

hmpf, sry, another problem (i thought i could handle it)

the bordercolour should be black...

i tried:

```
#pillmenu .ux-menu a
{
  border-top-color: black;
  border-bottom-color: black;
```

```
}

#pillmenu .ux-menu a.ux-menu-link-first
{
  border-left-color: black;
}

#pillmenu .ux-menu a.ux-menu-link-last
{
  border-right-color: black;
}

#pillmenu .ux-menu li li a
{
  border-top-color: black;
  border-bottom-color: black;
}

#pillmenu .ux-menu li li a.ux-menu-link-first
{
  border-left-color: black;
}

#pillmenu .ux-menu li li a.ux-menu-link-last
{
  border-right-color: black;
}
```

But it had no effect...

And is it possible to get the whole menu centered? at the moment it seems to be aligned left - so there is a gap at the right side.

Thank you a lot.

_____

Hey there, played a lot with the things and solved most problems. I dont know, if this is correct - but as far as i can see it works ;)

So here is what I implemented:

```
/* Remove arrows */
.ux-menu .ux-menu-arrow
{
 background-image: none;
}

#art-main .ux-menu-container .ux-menu a
{
 width: 102px !important;
}

.ux-menu-container .ux-menu a
{
  border-top-style: none;
  border-bottom-style: none;
```

```
  border-left-style: none;
  text-align: center;
  color: #ee9839;
}

.ux-menu-container .ux-menu .ux-menu-sub a
{
  border-top-style: solid;
  border-bottom-style: solid;
}

.ux-menu-container .ux-menu a.ux-menu-link-first
{
  border-left-style: none;
}

.ux-menu-container .ux-menu a.ux-menu-link-last
{
  border-right-style: none;
}

.ux-menu-container .ux-menu .ux-menu-sub a.ux-menu-link-first
{
  border-left-style: solid;
}

.ux-menu-container .ux-menu .ux-menu-sub a.ux-menu-link-last
{
  border-right-style: solid;
}

/* Remove sub-menus borders */
#art-main .ux-menu-container .ux-menu .ux-menu-sub a
{
  border-left-style: none;
  border-right-style: none;
  border-bottom-style: none;
  border-top-style: none;
}
```

But the problem with the width of the submenu I cant fix. It is about 10px to short and the worst about that is, that it cuts the image.

Perhaps here someone can help. Big thanks to you.

_____

no, problem still exists. The submenu-boxes have a different width, and the image is not shown complete.
the submenu-boxes need about 10-15px more in their width.

If you look at the page, I made the buttons a png. The surrounding of the png-button is invisible.
Is it possible, to make the background behind the png invisible too? Dont know why, but in over-mode of the button it is
allready right. should be the same in normal and current mode.

Thanks in advance :)

_____

Add the following CSS rules:

.ux-menu-container .ux-menu a
{
  background-color: transparent;
}

.ux-menu-container .ux-menu .ux-menu-sub a
{
  padding-right: 24px;
}

Regards,
ARI Soft
