Hi,

It does work, but only when I use the menu in vertical position. It results in a drop right, but de the drop down horizontally does not function.

This problem with site template styles. Add the following CSS rules to "CSS Styles" parameter in module settings:

```
BODY #header {overflow:visible;}
BODY #header UL.ux-menu-hidden {display:none}
BODY #header .ux-menu-container UL {padding:0;margin:0;}
```

It doesn't require to modify any file. Open "ARI Ext Menu" module settings page and add the CSS rules to "CSS Styles" parameter.
