
Clicking submenu results in only submenu itembar

Posted by rvg - 2015/11/21 16:03

Hi,

If I click the submenu on the horizontal menubar, the full menubar disappears. Only the submenu item is shown on the menubar. I would like to have the full menubar after clicking submenu's.

I also would like to have some (a few spaces) on the left of the menubar, so it fits within the template and is equal to the image above.

www.zkvdeijsvogels.nl

Thanks in advance.

Kind regards,
Richard

Hello,

Set "Show only active sub-menus" parameter to "No" in module settings.
