Menu Style (font) is not working as expected.
Posted by john - 2010/07/22 20:11

_____

I have set the font to "bold" and size 14. But in 1 page it just use the default font, other pages work as expect. I can not see the different in the code.

Thanks for a great support.

_____

Could you provide links to both pages that we can investigate it?

Regards,
ARI Soft

_____

well I found out by adding:

.ux-menu a:hover{
  color: #0033FF;
  font-weight: bold; font-size: 14px;
}

.ux-menu a:visited{
  color: #0033FF;
  font-weight: bold;
  font-size: 14px;
}

will help my problem.
