
Main menu items styles not accessible in admin

Posted by cwdee - 2016/01/08 12:46

In the admin interface, I no longer unable to edit the main menu items styles parameters. Clicking on the Clear does nothing and the RGB code fields are not enterable.

What am I doing wrong?

Thanks, Chris

Hello,

Check that you use the latest version of the extension (2.2.11).

Did you just upload a new version, because when I checked yesterday the download was 2.2.10 which is what I am using.

We haven't updated the module recently.

If the problem still appears, we can investigate it if provide a temporary access to your J! backend by email.
