
Menu is not positioning correctly

Posted by cyberrock - 2016/03/07 07:44

After changing my Joomla template, i have noticed, my submenus are not lined up properly.

i have tries to use top in the css and all it does is just lift the whole menu..

How can i fix the top of the submenu, with out moving the top menu? <http://www.ari-soft.com/images/fbfiles/images/menu-e3f117542941a0c94e9d44449504f26e.jpg>

Hello,

Could you send a link to a page where the problem occurs?

Regards,
ARI Soft

Users have a slightly different menu, though, you can still see part of the problem with the newsletters menu

This problem with site template styles for default site template menu in the selected module position. Add the following CSS rules to "CSS Styles" parameter in module settings:

```
#sgmenu .ux-menu-container ul li ul {margin-top:0;}  
#sgmenu .ux-menu-container ul li {margin: 0;}
```
