## Absoulute Width

I am sorry if it is posted somewhere else, but nothing else has worked. I have your menu in the absolute container of a premium template and i can't get it to strech all the way across the screen without putting too many items in the menu

Thank You!

Hello,

Do you want to center the menu or do all main menu items with the same large width?

No. I would like it (the menu) to strech completely out, no matter the number of items. The item width is fine.
