Submenu hidden under body of the content

Posted by Mike66 - 2016/04/11 23:08

Hi support,

firstly, I would like to thank you for such great extension, it's my favourite menu, that I have used since the first Joomla! installation (1.5).

However, I am having issue with submenu on my new web page.
I am using two ARI EXT Menus on my web page and both are vertical. Everything works fine but when I move with mouse cursor, the part of submenu is hidden under content(body).
I also attach print screen, because I am testing this page only on my local wamp server.

Joomla version Joomla! 3.4.8, using template: siteground-j16-38.

Could you please help me to fix it?

Thanks for your hints.

Regards,

Mike http://www.ari-soft.com/images/fbfiles/images/hidden_submenu.png

Hello,

It seems this is a problem with site template styles. We can investigate the problem in more details if you send a link to a page where the problem occurs.

Regards,
ARI Soft

Hi ARI Soft,

As I mentioned before, there is no possbility to send you a link, because the site is on my localhost (test instance).

Could you indicate me, where could be the problem?
Or do you need to send you the template/file?
Waiting for your reply.

Thank you in advance.

Regards,

Mike

Use "Save Page As" menu item into a browser to save a page where the problem occurs with all files (HTML file, images, CSS and javascript files), place them into archive and send by email so we can investigate the problem.

Regards,
ARI Soft

Hello ARI Soft,

please, find attached the required zip.
The homepage is: ÃšvodnÃ¡ strÃ¡nka.htm and belonging files.
The root level, lets say 0 level is: 1_PracoviskÃ¡.htm and belonging files.
The menu item level -1 is: 2_Å truktÃºra ZÅ pri ZZ, LimbovÃ¡ 1, Bratislava.htm and belonging files. This is the level, which is hidden under body of the page.

Thank you.

Regards,

Mike http://www.ari-soft.com/images/fbfiles/files/pages.zip

Hello,

Add the following CSS rule to "CSS Styles" parameter in module settings:

BODY .leftcol .innercol {overflow:visible;}

Regards,
ARI Soft

Hi Support,

your recommendation has helped me with body content, however, I am using Simple Image Gallery (by JoomlaWorks) on my page and there is a problem with opened images (preview mode) and menu items overlapping. See attached printscreen.

Could you help me to solve this issue?

Thanks in advance.

Regards,

Mike http://www.ari-soft.com/images/fbfiles/images/print_screen.jpg

It looks a problem with z-index CSS property. You can try to change it in module settings. If it doesn't help, provide a link to a page where the problem occurs so we can investigate the problem in more details.

Regards,
ARI Soft
