
Incorrect width on last button

Posted by hovmedia - 2010/07/27 13:28

Hi!

First I must say that you have a lot of great products :-)

I have an issue with the ari ext menu. the width were incorrect to start with so I used the code below that I found in another tread:

```
.ux-menu-container .ux-menu a.ux-menu-link-last
{
    width: 154px;
}
```

The problem is that the last button is 3-4px shorter than the others?!? I have replaced button etc, but always get same issue on the last one.

What went wrong???

Link (still under construction): <http://hovmedia.com/oaseshop/>

Hello,

If you want to do all menu items with the same width, add the following CSS rule instead of your CSS rule:

```
.ux-menu-container .ux-menu a
{
    width: 158px;
}
```

Regards,
ARI Soft
